

Los Molinos Safe Routes to School Project

The project is funded by a federal SRTS grant of \$500,000. Construction may take place as early as the summer of 2016, but may be delayed to the summer of 2017 due to the installation of a storm drain on Grant and Orange Streets. Construction to be scheduled when school is not in session. The project includes sidewalk, intersection improvements, and roadway shoulder improvements in the area shown on the map.
