Re: Groundwater Sustainability Agency Governance Structure

Dear Mr. Teubert,

Thank you for appearing at the August 11, 2015 City Council meeting and presenting the information regarding the Sustainability Groundwater Management Act. Your presentation was very well done and informative.

As you know, after your presentation, the consensus of the Corning City Council was to concur with the Governance structure that you had proposed where the Flood and Water Conservation District Board would serve as the Groundwater Sustainability Agency and the cities, including the City of Corning would have seats on the Groundwater Commission.

Please call me if you have any additional questions regarding this matter.

John L. Brewer, AICP
City Manager
